If a Watercourse was Impacted, Describe Fully.\* N/A

Describe Cause of Problem and Remedial Action Taken.\* Flowline ruptured releasing produced water into a pasture. Fluid pooled in a low spot where it is being removed by vacuum truck.

Describe Area Affected and Cleanup Action Taken.\* The course of release is approximately 10' by 300' running downhill to a low spot where fluid has pooled and is being removed via vacuum truck. Flowline was exposed and being repaired at the time of reporting.

I hereby certify that the information given above is true and complete to the best of my knowledge and understand that pursuant to NMOCD rules and regulations all operators are required to report and/or file certain release notifications and perform corrective actions for releases which may endanger public health or the environment. The acceptance of a C-141 report by the NMOCD marked as "Final Report" does not relieve the operator of liability should their operations have failed to adequately investigate and remediate contamination that pose a threat to ground water, surface water, human health or the environment. In addition, NMOCD acceptance of a C-141 report does not relieve the operator of responsibility for compliance with any other federal, state, or local laws and/or regulations.
