Dear Doc,

Please include this E-mail in the file for verification and certification that Price LLC on Behalf of Key had P&A the MW's.

Thank You!

Dear Jim,

As you know the Old Truckers II Brine Well BW-18 site has been P&A, pit reclaimed, site restored, and MW's plugged. We had received approval from OCD on all aspects but when checking the files did not actually see anything in the BW-18 file. However, the well file does show District I approval with a signed C-103. Please include the following information in the BW-18 file with this correspondence. Please note the MW's were cut off about 18" below grade and grouted with cement to surface, allowed to settle, re-grouted again to bring to top of pipe, and then allowed to set before covering. Due to a computer failure, photos have been lost.

In addition, the NMSLO has signed off, please see the second sheet in the Well file C-103.
