After reaching T.D. of 507' it was determined that further evaluation of the Santa Rosa Formation is needed before completion attempts can be made. Therefore, as discussed with Mr. Stamets of NMOCC on 10-12-78 and again with Mr. Ulvog on 10-13-78, Samedan has elected to run 5 1/2" 14# per/ft. csg. and cement with a sufficient quantity of cement to circulate to the surface, cap the casing with a swedge and valve in order to temporarily abandon the subject well. We anticipate the formation evaluation to take approximately 6 months. Verbal approval, attained 10-12-78.

Other reports shall be forth coming.
