SWEETMAN & ADAY
DRILLING ASSOCIATES

Re: Cecil D'Spain #1
NENW Sec. 12-6N-6E
Torrance County

Total depth at the above captioned well at 6 p. m. today has reached 310' and the formation here is a light gray limestone. Drilling is progressing satisfactorily at the rate of approximately 9 feet per day and the water in the hole has diminished and is only negligible. The hole is in good shape and, barring mechanical difficulties, progress should continue.
