---

Jacob,

At this time the BLM would prefer to delay all surface disturbance as prescribed in the work plan. At this time we would rather treat the impacted area s with Micro Blaze, monitor through the monsoons and into early fall. At that time I suggest we look at areas 1 and 2 and make a call as to the need for a total scrape of if spot removal may be a better way to go. The BLM is not interested in removing or wiping out the dunal features unless we have too. If any questions, please get back to me @ 575-234-5909.

Thanks
