If a Watercourse was Impacted, Describe Fully.* <b>N/A</b>		
Describe Cause of Problem and Remedial Action Taken.* <b>2" poly flowline that runs parallel to the lease road was run over, and was split open. The well was not running, but tubing and casing valves were open and fluid was released onto the roadway.</b>		
Describe Area Affected and Cleanup Action Taken.* <b>Release migrated on the lease road and ran off approximately 480' into an erosional ravine (wash area). The width of the wash area measured approximately 1' to 3'. Tetra Tech inspected and collected samples to assess and define extents. After a heavy rain, Tetra Tech collected additional samples to re-evaluate the spill area. Based on the results, the heavy rains had washed out majority of the chlorides from the soils. Due to access issue and limited impact, no further action was proposed. Tetra Tech prepared closure report and submitted to NMOCD and BLM for review.</b>		
I hereby certify that the information given above is true and complete to the best of my knowledge and understand that pursuant to NMOCD rules and regulations all operators are required to report and/or file certain release notifications and perform corrective actions for releases which may endanger public health or the environment. The acceptance of a C-141 report by the NMOCD marked as "Final Report" does not relieve the operator of liability should their operations have failed to adequately investigate and remediate contamination that pose a threat to ground water, surface water, human health or the environment. In addition, NMOCD acceptance of a C-141 report does not relieve the operator of responsibility for compliance with any other federal, state, or local laws and/or regulations.
