Subject: Lime Rock - Special Use - Geotechnical Borings
Date: Thursday, July 24, 2014 2:24:07 PM

Michael and April

We have a firm date with a geotechnical rig on the 29th (see below) that I do not want to let go. These are the borings to help the engineers design the foundation for the Multi-Well Fluids Management Pit that is the subject of the Commercial Lease application (transmitted to April on 7/15 by Dave Hamilton). The data will also help us determine how much caliche is present for the mining lease.

I hope we proceed with the borings and, if necessary, clean up any paperwork after the fact. If this is a problem, please contact me.

I appreciate your understanding.

Subject: RE: Updates for Lime Rock

Randy,

We are scheduled to drill at Lime Rock on Tuesday, July 29th.

Thank you,

Erica M. Hart | Quality Assurance Manager & Geologist
