RE: Oxy \* Conoco State 10 A 1Y \* 30-015-23289 \* 2RP-2741

Your work plan is approved with the following stipulations:

- Please provide confirmation samples for OCD approval prior to backfilling the excavation.
- Please ensure confirmation samples are tested for both Chlorides and TPH as written in the work plan.

OCD approval does not relieve the operator of liability should their operations fail to adequately investigate and remediate contamination that may pose a threat to ground water, surface water, human health or the environment. In addition, OCD approval does not relieve the operator of responsibility for compliance with any other federal, state, local laws and/or regulations.

If you have any questions or concerns, and for notification, please contact me.

Heather... no we want to excavate to where the chloride concentrations are 1000 ppm. The results show no TPH concentrations so the depth where the chlorides clean up to 1000 ppm will be the excavation depth. Confirmation samples of sides and bottom will be taken.

Ms. Neeld,

I am currently reviewing your work plan for the Conoco State 10 A 1Y and I want to be clear of the intended excavation depths. Will you be taking this down to 8' at BH-1 and 4' at BH-2?

Thank you,

Heather Patterson
