Ltr to NMOCD - Remediation of Beeson F Federal #29 -February 25, 2015.pdf

Heather,

Attached for your review and approval is our final report on the remediation of the Beeson F Fed #29 release site. I have included the C-141 report form, updated to include what was done along with photos. We still need to re-seed the site, but we have asked for advice from the BLM about the best time to do that task.

Thank you for your guidance and patience.

Larry D. Davis
Environmental Quality & Safety Manager
