Hello Mike,

I wanted to touch base with you and advise you of a release at the above referenced well, API 30-105-04618. The well is on BLM land in the Hackberry Rec Area. This released was discovered yesterday and the line has been repaired. I'm working with Jennifer Van Curen at BLM on the remediation from their side. We have the archeological issues worked out and can now start work. Attached are the maps of the release site. I plan to be on site with equipment tomorrow (Wed) to start getting the saturated soil excavated and on plastic. Once I get this up I'll work on the remainder of the remediation, this is at the bottom of a hill and into an arroyo that feeds a buffalo, so I'm kind of in a hurry on it.

Please let this serve as official notification of the release. I'll get you a C 141 shortly. Please call me if you have any questions. Luis Gonzales is the contact for Southwest Royalties, 432-661-4708.
