Kimberly,

This plan is approved as written with the following conditions of approval:

**Please, adhere to stipulations added by NMOCD.** BLM approval of this proposal does not relieve the operator of liability, should their operations fail to adequately investigate and remediate contamination that may pose a threat to groundwater, surface water, any other aspects of the natural environment, human health, or if the location does not properly reclaim. In such an event that location does not re-vegetate, or future issues with contaminants are encountered, the operator will be asked to address the location until contaminant issues are fully mitigated and the location is successfully reclaimed. In addition, BLM approval does not relieve the operator of responsibility for compliance with any other federal, state, or local laws/regulations.

Bests,

Sol

Kimberly,

The work plan for this site is approved with the following exceptions:

- Confirmation samples in the area of S-3 must also include TPH to ensure all hydrocarbon RRALs are met;
- OCD must review and approve confirmation samples in the areas of S-3 and S-4 prior to backfill.

OCD approval does not relieve the operator of liability should their operations fail to adequately investigate and remediate contamination that may pose a threat to ground water, surface water, human health or the environment. In addition, OCD approval does not relieve the operator of responsibility for compliance with any other federal, state, local laws and/or regulations.

If you have any questions or concerns, and for notification, please contact me.

Heather Patterson

Heather and Mike,

Please find the amended work plan for the above referenced release.

Thank you.
