Cliff,

Your proposal for remediation of the above referenced release is approved. Federal sites will require like approval by BLM.

OCD approval does not relieve the operator of liability should their operations fail to adequately investigate and remediate contamination that may pose a threat to ground water, surface water, human health or the environment. In addition, OCD approval does not relieve the operator of responsibility for compliance with any other federal, state, local laws and/or regulations.

If you have any questions or concerns, and for notification, please contact me.

Mike,

This e-mail is to confirm our conversation on October 28, 2014 about the remediation plan for the above referenced site. I have attached the materials that we used in our discussion. If you will review the revised diagram on the attachment, it depicts the remediation plan and the areas and depths of the excavations per our discussions. After the soil is excavated, the site will be backfilled with clean soil.

If you would please e-mail your concurrence with this remediation plan, it would be greatly appreciated.

Thanks, Cliff

Cliff,

This plan looks good for the most part. Two things:

1. After excavation, a confirmation sample needs to be taken at the SP3 area. This sample should show a maximum of 1000ppm Chloride. If this level is not reached, further excavation will be required.
2. After the surface scrape, a confirmation sample needs to be taken at the SP4 area. This sample should show a maximum of 1000ppm Chloride. If this level is not reached, excavation may be required.
