Just a quick update. I plan to have site scraped and ready to test some time this week. I had some flow line work on the Kersey today and was able to work on the clean -up . I did pick up the jars for the samples but I will likely use those on the Rose site over in Lea County . My exact schedule will depend on my progress with the Rose and also the weather. I will pick up more jars when I deliver the Rose samples to Cardinal labs. THANKYOU
