---

Ronnie,

Per my conversation with Denise today, Talon will be mobilizing equipment to the above location on Monday the 8th of June. The remediation activities will only take about one day. I will be on site around 9:30 am to go over the scope of work with my equipment operators, take a walk thru for the job safety evaluation (tailgate safety meeting) and sweep the area with our line finder to make sure there is not any unmarked lines in the area, or do our best to verify.

I will however, need a representative from Devon meet me on site to provide a ground disturbance permit around 9:30 am before we can begin the remediation activities.

Thank you. I look forward to putting a face with the name.

Kimberly.
