RE: Devon \* Black Jack 1 Fed 2 Battery \* 30-015-31864 \* 2RP-3039

Rebecca,

Thank you for sending the revised work plan. It is approved as written. Like approval by BLM is required for federal sites.

OCD approval does not relieve the operator of liability should their operations fail to adequately investigate and remediate contamination that may pose a threat to ground water, surface water, human health or the environment. In addition, OCD approval does not relieve the operator of responsibility for compliance with any other federal, state, local laws and/or regulations.

If you have any questions or concerns, and for notification, please contact me.

Heather Patterson

Good Morning,

I have revised the work plan on the above location in that, we will retrieve soil samples of the excavated area to confirm that chlorides are below 1000 mg/kg and the TPH levels < 5000 ppm. For your convenience I have included the site map of the spill area with the sample point positions. Please let me know if you have any questions. Heather, would you please send me an email if you concur?

*Thank You*

*Rebecca Pons*
