Chase,

The OCD approves the use of this caliche stockpile.

Heather Patterson

Section 2, T20S-R24E  
Eddy County, New Mexico

Mr. Bratcher,

There is currently a stockpile of caliche on the above mentioned location that analytical results (Total BTEX: <0.3, Chloride: 272, GRO C6-C10: <10.0, DRO >C10-C28: 48.0) show is under the RRAL for the site ranking zero (0). Yates Petroleum Corporation would like to use this caliche as backfill in the S1 area of remediation. A composite sample was collected at multiple depths and at 3 different sample points of the stockpiled caliche. Samples were obtained by using a backhoe to dig from the top of the stockpiled caliche to the bottom, and grab samples taken at random depths of the digging process.

Thanks,

*Chase Settle*
