RE: XTO * Remuda Basin 19 Fed. #2 SWD * 30-015-28901 * 2RP-3152

Mr. Burton,

The OCD is in receipt of your remediation proposal for the above referenced site. XTO has OCD's permission to begin work on this site, but certain stipulations must be met for closure:

- A confirmation lab sample including BTEX, TPH, and chlorides will be required at each sample point;
- A liner will be required in the area encompassing SB1, SP1, SP2, and SP4;
- Any other areas showing elevated chlorides should be cleared with OCD prior to backfill and may also require a liner;
- Confirmation samples must meet RRAL's for a site ranking of 10 before the site is backfilled.

OCD approval does not relieve the operator of liability should their operations fail to adequately investigate and remediate contamination that may pose a threat to ground water, surface water, human health or the environment. In addition, OCD approval does not relieve the operator of responsibility for compliance with any other federal, state, local laws and/or regulations.

If you have any questions or concerns, and for notification, please contact me.

Heather Patterson
