---

Rebecca,

It appears that the two older releases occurred in the same location, all within the unlined battery, so if you could address all three in your remediation that would be great. I do not have an RP for this release yet. That gets assigned during data entry in our office.

Thanks,

Heather Patterson

Good afternoon,

I have attached the C-141 associated with the spill on the above location. Upon reviewing the NMOCD website I have noticed that there are two other open C-141's for this site 2RP-1391 and 2RP-1686 respectively. Please advise me on how you would prefer that I proceed. If necessary, we can remediate for all spills at one time. Also, please advise me on the RP number for this spill.

Have a great evening,

*Thank You*

*Rebecca Pons*
