RE: Devon * Hackberry 16 SWD 1 * 30-015-41783 * Hackberry Recycling Facility (2RF-102) * M-16-19s-31e

NMOCD Tracking: **2RP-3146** & **3147** * Date of release: 7/15 & 16/2015

Greetings,

The remediation proposal, submitted on behalf of Devon Energy by Talon LPE, for the above referenced releases, is approved with the following conditions of approval:

- Further delineation for chloride will be required in the areas identified as S-2 and S-3. Target delineation goal is 250 mg/kg.
- In the area identified as S-6, OCD agrees with the proposed 4' excavation. Deeper confirmation/delineation sample/samples will be required, with delineation target being 250 mg/kg. OCD does request samples be obtained during excavation of this area from S-6 to the area around the pipeline towards S-7. For this site, if data shows the 4' interval to be in the 1500 mg/kg range, a liner will not be required under the DCP pipeline. Field screens are acceptable for this procedure, including the S-6 delineation.
- Like approval by BLM.

OCD approval does not relieve the operator of liability should their operations fail to adequately investigate and remediate contamination that may pose a threat to ground water, surface water, human health or the environment. In addition, OCD approval does not relieve the operator of responsibility for compliance with any other federal, state, local laws and/or regulations.

If you have any questions or concerns, and for notification, please contact me.

Mike and Heather,

Attached please find the work plan. The complete plan is too large, I will have to divide it up.

Kimberly M. Wilson
