Bob,

Your request for closure of the above referenced release is approved.

OCD approval does not relieve the operator of liability should their operations fail to adequately investigate and remediate contamination that may pose a threat to ground water, surface water, human health or the environment. In addition, OCD approval does not relieve the operator of responsibility for compliance with any other federal, state, local laws and/or regulations.

Mike,

Attached is the Form C-141 Final Report, sample diagrams and analytical results for the Pathfinder AFT State #13. Scope of work included the excavation of five (5) feet of impacted soils from the entire battery area. Samples have been collected to a depth of eight (8) feet or 13' BSL within the battery, also a up gradient sample (approximately 20' uphill and to the NE of the excavation) was collected, based on the enclosed sample results, Yates Petroleum Corporation requests closure.

Thank you.
