Describe Cause of Problem and Remedial Action Taken.*
 A ¼ inch high pressure hose failed on murphy kill. 35 barrels of produced water was released, 30 barrels being inside the lined containment. The fluid inside the containment was recovered via vacuum truck. The high pressure hose was replaced.

Describe Area Affected and Cleanup Action Taken.*
 A vacuum truck was called to the location and was able to recover 30 barrels PW from inside the lined containment. The ¼ inch hose was replaced. Samples were collected, and based on laboratory analytical data and NMOCD approval: the contaminated soil has been excavated and hauled to a state approved disposal facility and the excavation backfilled with clean soil.

I hereby certify that the information given above is true and complete to the best of my knowledge and understand that pursuant to NMOCD rules and regulations all operators are required to report and/or file certain release notifications and perform corrective actions for releases which may endanger public health or the environment. The acceptance of a C-141 report by the NMOCD marked as "Final Report" does not relieve the operator of liability should their operations have failed to adequately investigate and remediate contamination that pose a threat to ground water, surface water, human health or the environment. In addition, NMOCD acceptance of a C-141 report does not relieve the operator of responsibility for compliance with any other federal, state, or local laws and/or regulations.
