Thank you Rebecca!

This closure request has been approved.

OCD approval does not relieve the operator of liability should their operations fail to adequately investigate and remediate contamination that may pose a threat to ground water, surface water, human health or the environment. In addition, OCD approval does not relieve the operator of responsibility for compliance with any other federal, state, local laws and/or regulations.

If you have any questions or concerns, please contact me.

Good Morning,

As discussed previously with Mr. Allen; I have attached the closure documentation for the above location. This is the incident that was assigned **2RP-2736**.

I have included in the report and the C-141 that was marked "final". However, it was never officially closed, due to the fact that there was no closure documentation provided. Please let me know if you have any questions or need any additional information regarding this incident.

*Thank You*
