RE: Pyote \* Fanning SWD \* 30-015-20920 \* 2RP-2330

Audra,

After reviewing the documentation from the above listed site, the following is required:

- A full delineation to be completed both vertically and horizontally. It is recommended that you re-sample the area due to the length of time and rain events since the last sampling date;
- Additional delineation samples from the SWD pad location;
- A site ranking, to include a depth to groundwater investigation;
- A remediation proposal submitted by Pyote to be approved by the OCD.

OCD approval does not relieve the operator of liability should their operations fail to adequately investigate and remediate contamination that may pose a threat to ground water, surface water, human health or the environment. In addition, OCD approval does not relieve the operator of responsibility for compliance with any other federal, state, local laws and/or regulations.

If you have any questions or concerns, and for notification, please contact me.

Heather Patterson  
Environmental Specialist

**Importance:** High

Heather,

At that point we had put a hold on any work due to the circumstances with the land owner.
