**Re: Lakewood Farms SWD 18 #1**  
**30-015-28164**  
**Sec. 18, T19S-R26E**  
**Eddy County, NM**

Mr. Mike Bratcher,

COG Operating LLC would like to submit for your consideration the enclosed work plan for the above captioned well. The plan is in response to the C-141 Initial report dated January 27, 2015.

### **Background**

The release consisted of 5 bbls of produced water and drilling fluid of which 5 bbls were recovered. The release was caused during re-entry of a well resulting in water and cement coming out of a small hole on location about 70 feet away from the wellhead. Once noticed, crews immediately stopped circulating and the fluid stopped. The fluid released was picked up with the use of a vacuum truck and disposed of properly. The surface casing was repaired by using a squeeze cement job which was pressure tested to ensure its integrity.

### **Groundwater**

Based on the New Mexico Office of the State Engineer, the release area would be classified at a site ranking of **Ten** due to the depth of groundwater at approximately 69'. COG does not believe groundwater was impacted by this release.

### **Soil Assessment and Analytical Results**

Sample points taken are depicted as S1 and S2 on the attached site diagram along with a summary sample table. Samples were tested for chloride concentrations and prove to be low to non-detect in concentration.

**Work Plan**

COG Operating LLC proposes that no further work be required based on the information provided to the NMOCD through sampling and the corrective actions taken once the release was discovered.

If there are no objections or further stipulations, COG Operating LLC requests closure of the aboved captioned well. Please feel free to contact my with any questions or concerns at (505) 350-1336.

Sincerely,

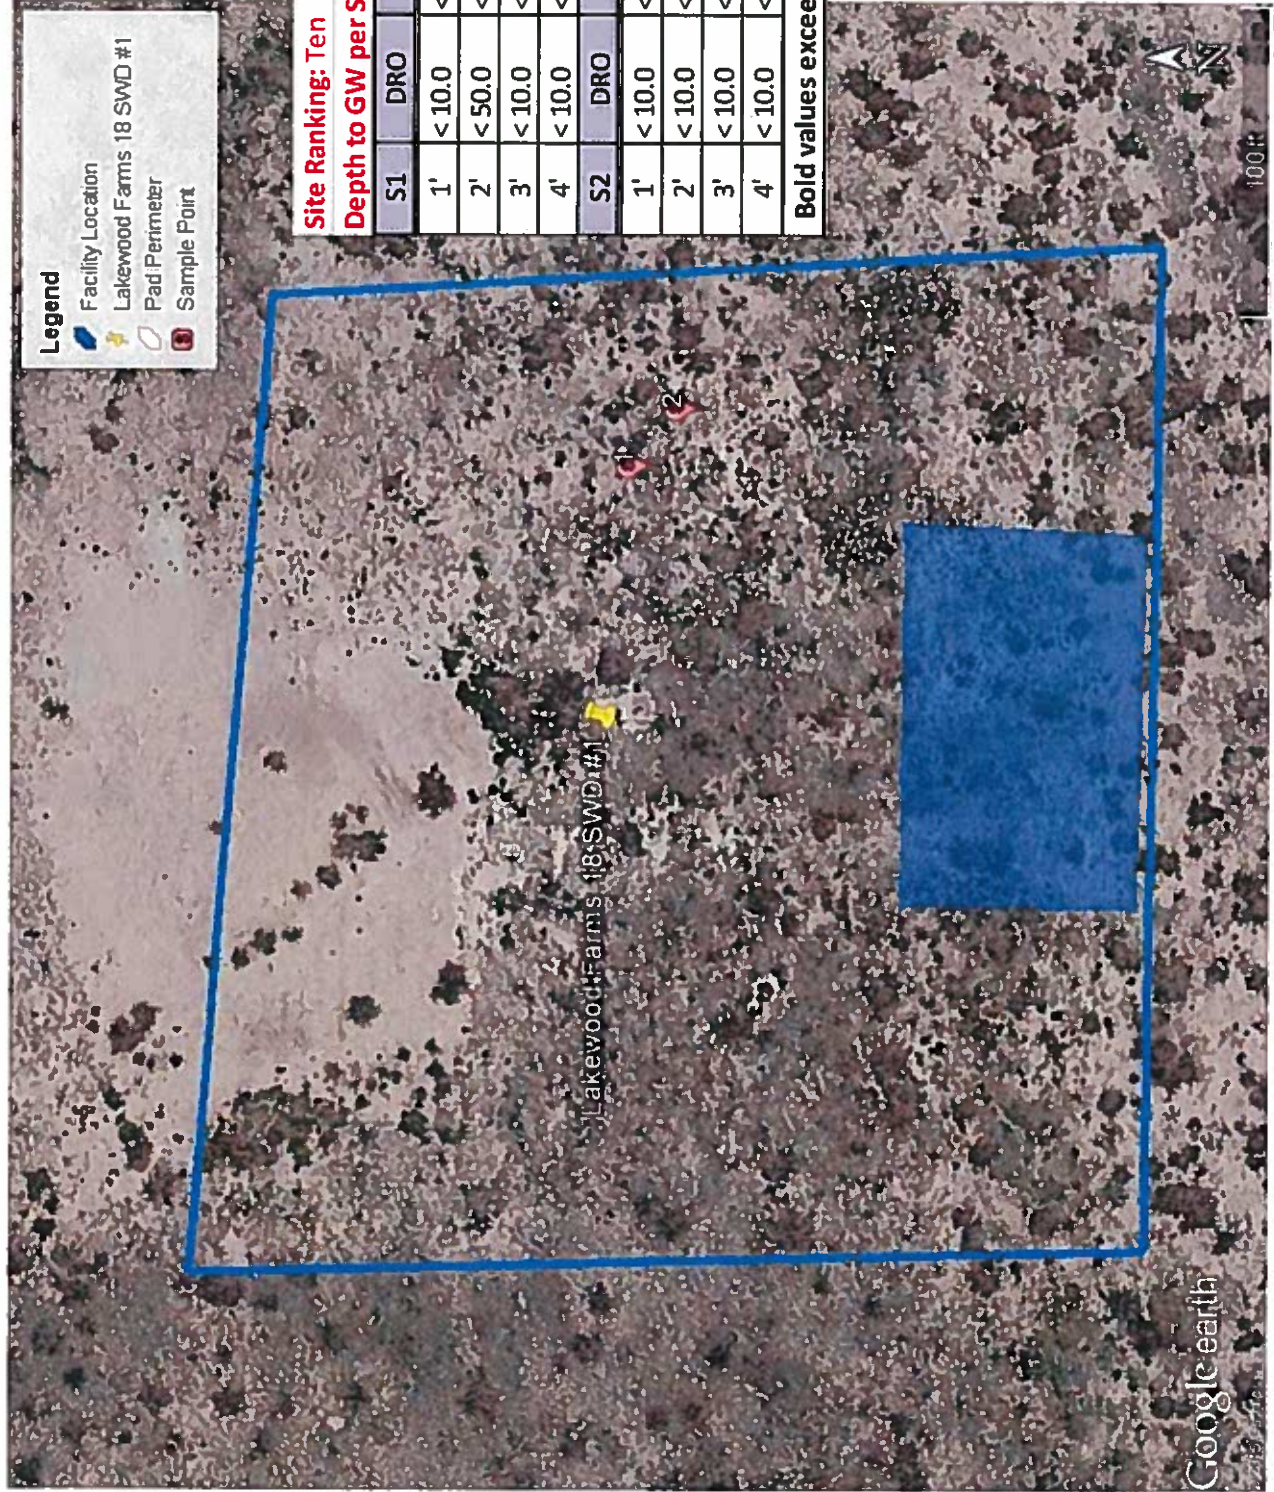

Amanda Trujillo

Senior Environmental Coordinator

**Enclosed**

RE: LAKEWOOD FARMS SWD #1

Enclosed are the results of analyses for samples received by the laboratory on 08/21/15 11:07.

Cardinal Laboratories is accredited through Texas NELAP under certificate number T104704398-13-5. Accreditation applies to drinking water, non-potable water and solid and chemical materials. All accredited analytes are denoted by an asterisk (\*). For a complete list of accredited analytes and matrices visit the TCEQ website at [www.tceq.texas.gov/field/qa/lab\\_accred\\_certif.html](http://www.tceq.texas.gov/field/qa/lab_accred_certif.html).

Cardinal Laboratories is accredited through the State of Colorado Department of Public Health and Environment for:

Method EPA 552.2	Haloacetic Acids (HAA-5)
Method EPA 524.2	Total Trihalomethanes (TTHM)
Method EPA 524.4	Regulated VOCs (V1, V2, V3)

Accreditation applies to public drinking water matrices.

This report meets NELAP requirements and is made up of a cover page, analytical results, and a copy of the original chain-of-custody. If you have any questions concerning this report, please feel free to contact me.

Sincerely,

Celey D. Keene

Lab Director/Quality Manager

Latitude 32.666242661266 Longitude -104.427663555328

**NATURE OF RELEASE**

Type of Release: Produced Water and drilling fluid	Volume of Release: 5 bbls	Volume Recovered: 5 bbls
Source of Release: Well	Date and Hour of Occurrence: 1/10/2015	Date and Hour of Discovery: 1/10/2015
Was Immediate Notice Given? <input type="checkbox"/> Yes <input checked="" type="checkbox"/> No <input type="checkbox"/> Not Required	If YES, To Whom? Randy Dade - NMOCD	
By Whom? Kyle Canzian	Date and Hour: 1/22/2015	
Was a Watercourse Reached? <input type="checkbox"/> Yes <input checked="" type="checkbox"/> No	If YES, Volume Impacting the Watercourse.	

If a Watercourse was Impacted, Describe Fully.\*

Describe Cause of Problem and Remedial Action Taken.\*

While re-entering well crews noticed water and cement coming out of a small hole on location about 70 feet away from well head. Crews stopped circulating and the fluid stopped coming out. The spilled fluid was picked up by a vacuum truck and disposed of properly. The leak at the surface casing was repaired by a squeeze cement job, and the repaired casing passed the pressure test.

Describe Area Affected and Cleanup Action Taken.\*

Concho will have the spill site investigated to determine any possible contamination from the release and we will present a remediation work plan to the NMOCD for approval prior to any significant remediation work.

I hereby certify that the information given above is true and complete to the best of my knowledge and understand that pursuant to NMOCD rules and regulations all operators are required to report and/or file certain release notifications and perform corrective actions for releases which may endanger public health or the environment. The acceptance of a C-141 report by the NMOCD marked as "Final Report" does not relieve the operator of liability should their operations have failed to adequately investigate and remediate contamination that pose a threat to ground water, surface water, human health or the environment. In addition, NMOCD acceptance of a C-141 report does not relieve the operator of responsibility for compliance with any other federal, state, or local laws and/or regulations.
