RE: COG * Loco Hills 33 #6 SWD * 30-015-39478 * 2RP-2844

Lucas,

This closure request for the above referenced release is denied. The agreed upon excavation depths were 1 foot in the area northwest of the battery, and 3 feet on the east side. The 3" scrape that was performed instead is an unacceptable remediation.

OCD approval does not relieve the operator of liability should their operations fail to adequately investigate and remediate contamination that may pose a threat to ground water, surface water, human health or the environment. In addition, OCD approval does not relieve the operator of responsibility for compliance with any other federal, state, local laws and/or regulations.

If you have any questions or concerns, and for notification, please contact me.
