If a Watercourse was Impacted, Describe Fully.\*

Describe Cause of Problem and Remedial Action Taken.\*

Water was being transferred into the gun-barrels and the facility storage tanks to supply water to the Aquilla rig #8, a valve was discovered closed on the transfer line to the storage tanks causing the gun-barrels to overflow inside the impervious containment. The containment overflowed into the adjoining impervious containment around the skim tank and onto the ground. The valve alignment was corrected and vacuum trucks started recovering the spilled produce water.

Describe Area Affected and Cleanup Action Taken.\* *Basin Environmental began the spill remediation efforts for the PW spill on 12/3/13 and was completed on 2/7/14. During this time frame approximately 8,020 cubic yards of contaminated soil was removed from site and transported to an approved NMOCD disposal site. Please reference the Remediation Summary & Risk-Based Closure Request dated December 2015.*

I hereby certify that the information given above is true and complete to the best of my knowledge and understand that pursuant to NMOCD rules and regulations all operators are required to report and/or file certain release notifications and perform corrective actions for releases which may endanger public health or the environment. The acceptance of a C-141 report by the NMOCD marked as "Final Report" does not relieve the operator of liability should their operations have failed to adequately investigate and remediate contamination that pose a threat to ground water, surface water, human health or the environment. In addition, NMOCD acceptance of a C-141 report does not relieve the operator of responsibility for compliance with any other federal, state, or local laws and/or regulations.
