Bill,

Thank you so much for your prompt reply. Heather Patterson (NMOCD Dist 2) and I would love any additional information you could gather for us. The case studies presented did not answer some of the questions we had.

In regards to the timeline, I am quite certain RKI would like an answer regarding their work plan as quickly as I can get it to them.... ☺

If you have any questions or concerns, please do not hesitate to contact me.

Sincerely,

Shelly J Tucker

Good Afternoon Ms. Tucker,

This is confirming our earlier phone call, in which you requested case studies and information about the longer-term results of the use of MicroBind, as proposed for the RKI remediation site. This link is to the MicroBind website, where two case studies and a presentation for those case studies are immediately available:

<http://www.envirocleanps.com/microbind>

Mr. Jonathan Behymer and Ms. Diane Becker will gather additional information and forward it to you. Do you have a response-needed-by timeframe, to aid in scheduling?

I also want to Thank You for the words of encouragement about the possibility of studying guar as an occlusive barrier. I hope to be able to set up bench studies in the near future to determine if this could be a viable saltwater binding technology.

Sincerely,

William "Bill" Green, PG 136
