The **BLM acceptance/approval does not** relieve the operator of liability should their operations have failed to adequately investigate and remediate contamination that may pose a threat to groundwater, surface water, human health or the environment or if the location fails to reclaim properly. In such an event that the location does not revegetate, or future issues with contaminants are encountered, the operator will be asked to address the issues until the contaminant issues are fully mitigated and the location is successfully reclaimed. In addition, BLM approval does not relieve the operator of responsibility for compliance with any other federal, state or local laws/regulations.

I do not have a C-141 or a WP for this release...what is the status?

The BLM approval/acceptance does not relieve the operator of liability should their operations have failed to adequately investigate and remediate contamination that may pose a threat to groundwater, surface water, human health or the environment or if the location fails to reclaim properly. In such an event that the location does not revegetate, or future issues with contaminants are encountered, the operator will be asked to address the issues until the contaminant issues are fully mitigated and the location is successfully reclaimed. In addition, BLM approval does not relieve the operator of responsibility for compliance with any other federal, state or local laws/regulations.

If you have any questions or concerns, please do not hesitate to contact me.

Sincerely,

Yesterday, 7/26/2015, we had a release at the above mentioned lease. A 4" poly flow-line ruptured near the transfer pump. The release was the result of a faulty check valve causing the line to overpressure.

A total of 59 bbls were released. 45 bbls were in a lined containment and were recovered. 14 bbls were just outside of the containment on the location pad, and 10 bbls were recovered.

A C-141 will be sent ASAP, and a work plan will be developed.
