RE: Pyote Well Service LLC \* Rohmer 1 \* 30-015-25722 \* F-23-22s-27e  
2RP-1916 \* Date of release: 8/28/2013

Billy,

After a review of the remediation proposal submitted by Talon (Dated December 1, 2015), OCD does request further delineation in the tank battery area, preferably in the vicinity of the area identified as S-8 on the site diagram. This area may be accessible, with surface owner's approval, on the west side through the barbed wire fence. Based on depth to ground water, proximity to water supply wells, and current OCD policies, the delineation request is for chlorides, with target goal being 250 mg/kg. At least one representative sample will need to be tested for TPH and BTEX. If testing determines non-detect, no more testing for these constituents will be required. Please advise of the feasibility and/or scheduling of this event.

If you have any questions or concerns, please contact me.

Mike,

Did you receive this? I tried to send it to you last week, but it looks like it may have gotten hung up in my outbox.

Thanks,

**Sheldon L. Hitchcock**
