Subject: RE: OCD_2RP-3210_Remediation Plan_1.7.16

Hello Mike,

RP #, 2RP-3210

Current Remediation Plan,

I concur with you on the site ranking a zero. Frontier believes the removal of the natural caliche barrier from this site would not be practicable. Additionally, Frontier feels that this area would not pose any risk to fresh water, public health, or to the environment. Thus, Frontier would like to follow your recommendations by placing a 20mil liner over the entire site. This entails, laying the liner on top of this natural caliche barrier which is ~3' under the areas natural surface soil and one foot under the newly replace pipeline. Continuing by replacing the entire area with clean soil and seeding the area accordingly. Upon completion, Frontier will send all supporting documentation with the reference # 2RP-3210 which was provided by you on 1/7/2016.

Thanks,
Harley Everhart

Respectfully,

Harley Everhart
