**RE: Burnett Oil \* Gissler B #31 \* 30-015-32200 \* 2RP-3320**

Johnny,

Thank you for obtaining further delineation. Your work plan for the above listed site is approved.

OCD approval does not relieve the operator of liability should their operations fail to adequately investigate and remediate contamination that may pose a threat to ground water, surface water, human health or the environment. In addition, OCD approval does not relieve the operator of responsibility for compliance with any other federal, state, local laws and/or regulations.

If you have any questions or concerns, and for notification, please contact me.

Mike/Heather/Shelly

Attached is the work plan & analytical for the remediation of the Gissler B 31. We collected samples down to 20' below surface. We were not able to get and deeper samples due to a dense caliche barrier. We weren't able to completely delineate, but we did show that the chlorides did decrease at deeper levels. I believe that the chlorides are being held up at the barrier. We would like to proceed with the remediation, so that we can start the regrowth process before the growing season. If there are any questions or concerns, feel free to contact us. Thanks.
