RE: BOPCO * PLU 232 * 30-015-34009 * 2RP-3463

Bradley,

Your proposal for remediation for the above listed site is approved. The OCD will require a lab confirmation sample (to include chloride, TPH and BTEX) at all three sample locations.

OCD approval does not relieve the operator of liability should their operations fail to adequately investigate and remediate contamination that may pose a threat to ground water, surface water, human health or the environment. In addition, OCD approval does not relieve the operator of responsibility for compliance with any other federal, state, local laws and/or regulations.

If you have any questions or concerns, and for notification, please contact me.

Mike/ Heather

Attached you will find the field log for sampling that was conducted at the PLU 232. An initial scrape of the spill area was conducted and the material was hauled to Lea Land for disposal. I would like to propose the following. Upon approval and completion of field work a final closure report will be submitted.

SP1- Surface has been removed. Request no further action
SP2- Surface has been removed. Request no further action
SP3- Surface has been removed. Propose removal to 1 foot

Thanks
Brad Blevins
