Describe Cause of Problem and Remedial Action Taken.* A pinhole developed on SWD riser tie in to main line due to internal corrosion. A vacuum truck was called to location and was able to recover 6 barrels of produced water from the ground surface.		
Describe Area Affected and Cleanup Action Taken.* The release occurred on the SWD riser at the tie in point of the main SWD line, the riser is located on the east side of Buck Jackson on the ROW. A vacuum truck was called to the location and was able to recover 6 barrels of produced water. Contaminated soil was excavated and hauled to a state approved disposal facility and samples were collected. Based on laboratory analytical data and NMOCD approval the excavation has been backfilled with clean soil.		
I hereby certify that the information given above is true and complete to the best of my knowledge and understand that pursuant to NMOCD rules and regulations all operators are required to report and/or file certain release notifications and perform corrective actions for releases which may endanger public health or the environment. The acceptance of a C-141 report by the NMOCD marked as "Final Report" does not relieve the operator of liability should their operations have failed to adequately investigate and remediate contamination that pose a threat to ground water, surface water, human health or the environment. In addition, NMOCD acceptance of a C-141 report does not relieve the operator of responsibility for compliance with any other federal, state, or local laws and/or regulations.
