NATURE OF RELEASE

Type of Release: Oil/produced water	Volume of Release: estimated 20 bbls	Volume Recovered: 8 bbls Oil/ 12bbls PW
Source of Release: Flowline	Date and Hour of Occurrence: 7-17-15	Date and Hour of Discovery: 7/17/15 10:30 am
Was Immediate Notice Given? <input type="checkbox"/> Yes <input checked="" type="checkbox"/> No <input type="checkbox"/> Not Required	If YES, To Whom?	
By Whom?	Date and Hour:	
Was a Watercourse Reached? <input type="checkbox"/> Yes <input checked="" type="checkbox"/> No	If YES, Volume Impacting the Watercourse.	

If a Watercourse was Impacted, Describe Fully.*

Describe Cause of Problem and Remedial Action Taken.* Flow line developed a pin hole causing release. Well was shut in to stop the release. Affected area – Leak point was an estimated 250 yards Southeast of well head in pasture down pipeline right of way. 2000 square feet of the right of way was affected. Vacuum truck was used to recover all standing fluid.

Describe Area Affected and Cleanup Action Taken.

On October 30, 2015, DFSI personnel were on site to obtain samples within the leak area. Three samples were obtained and field sampled for chloride levels, as well as BTEX. The BTEX samples were performed using a Mini Rae Photoionization Detector (PID). Augur refusal was encountered at all three sample points at depths of 5', 8' and 12' bgs, respectively. Due to the safety concerns of the presence of two high-pressure lines operating through the middle of the spill area, attaining confirmation clean samples for this spill was not possible. Samples that were attained before auger refusal were submitted for laboratory analysis at Cardinal Laboratories of Hobbs, NM. Per NMOCD and BLM request, on December 11, 2015, a soil bore was initiated at the site. Clean samples were obtained at 45' bgs and submitted for laboratory analysis. A revised work plan was submitted to NMOCD and BLM on December 18, 2015. Beginning January 8, 2016, DFSI personnel were on site to excavate the area to 4' bgs. The excavation was backfilled with clean, imported topsoil to ground surface and contoured to the surrounding area. Contaminated soil was properly disposed of at an NMOCD approved facility. The site was seeded with a blend of native vegetation.

I hereby certify that the information given above is true and complete to the best of my knowledge and understand that pursuant to NMOCD rules and regulations all operators are required to report and/or file certain release notifications and perform corrective actions for releases which may endanger public health or the environment. The acceptance of a C-141 report by the NMOCD marked as "Final Report" does not relieve the operator of liability should their operations have failed to adequately investigate and remediate contamination that pose a threat to ground water, surface water, human health or the environment. In addition, NMOCD acceptance of a C-141 report does not relieve the operator of responsibility for compliance with any other federal, state, or local laws and/or regulations.
