RE: WPX Energy * North Brushy Draw (PW gathering line) * **2RP-3684** * DOR: 5/8/16

Karolina,

Your current proposal for remediation of the above referenced release is approved. Please advise once remedial activities have been scheduled.

OCD approval does not relieve the operator of liability should their operations fail to adequately investigate and remediate contamination that may pose a threat to ground water, surface water, human health or the environment. In addition, OCD approval does not relieve the operator of responsibility for compliance with any other federal, state, local laws and/or regulations.

If you have any questions or concerns, and for notification, please contact me.

Thank you,

Mike Bratcher

Subject: Brushy Draw 35-12H - draft remediation plan

Good morning,

Attached is the draft remediation plan, which we discussed last week, for the brushy draw 35-12H spill. It includes laboratory reports for samples collected from the borehole and from the impacted area. It appears that the chloride impacts are not very deep and groundwater quality was not compromised by this spill. Please let me know if I need to make any changes to this plan. If not, I will send it again with NM SLO copied on the email.

Thank you so much for your help with this project,

Karolina Blaney
