Mike,

Yates has considered the OCD preference for remediation in regards to the S4 area and will address the S4 area according to OCD preference, excavating through the 6' interval before backfilling with caliche to the 4' mark where the 20 ml liner will be installed.

Thank you,

RE: Yates Pet * Allison CQ Fed 10 * 30-015-26192 * **2RP-3325** * DOR: 9/28/15

Chase,

Your proposal for remediation of the above referenced release is approved. It is OCD's understanding that 1' of material has been removed, and the proposal is to remove an additional 3' (4' total removal). A 20 mil liner will then be installed. OCD would prefer to have the area identified as S4, excavated through the 6' interval to remove the 9000mg/kg numbers. If Yates elects to remove this additional material, the area could be backfilled to the 4' interval with caliche and then the liner installed across the entire excavation. Please advise once remedial activities have been scheduled. Federal sites will require like approval from BLM.

OCD approval does not relieve the operator of liability should their operations fail to adequately investigate and remediate contamination that may pose a threat to ground water, surface water, human health or the environment. In addition, OCD approval does not relieve the operator of responsibility for compliance with any other federal, state, local laws and/or regulations.

If you have any questions or concerns, and for notification, please contact me.

Thank you,

Mike Bratcher
