RE: Apache Corporation * Loco Hills SWD Booster Station * fAB1535241846 * 2RP-3460

Bruce,

Your proposed excavation depths for the above listed release are approved. Your request for variance is approved. This said, the OCD would like you to attempt to achieve further chloride delineation during excavation activities in the area of SP8, if it can be done safely. Like approval by BLM is required for this location.

OCD approval does not relieve the operator of liability should their operations fail to adequately investigate and remediate contamination that may pose a threat to ground water, surface water, human health or the environment. In addition, OCD approval does not relieve the operator of responsibility for compliance with any other federal, state, local laws and/or regulations.

If you have any questions or concerns, and for notification, please contact me.

Subject: Loco Hills SWD Booster Station 2RP-3460 Corrective Action Plan

All,

Please find the attached corrective action plan for the above referenced site for your approval. Please let me know if you have any questions or wish to discuss. Thanks and have a good day.
