RE: Mewbourne Oil * Bebop 36 W 1 MD St #2H * 30-015-43320 * 2RP-3754

Zack,

Your closure request is approved.

OCD approval does not relieve the operator of liability should their operations fail to adequately investigate and remediate contamination that may pose a threat to ground water, surface water, human health or the environment. In addition, OCD approval does not relieve the operator of responsibility for compliance with any other federal, state, local laws and/or regulations.

If you have any questions or concerns, and for notification, please contact me.

If you're pretty sure you got it clean, just go ahead and grab a couple of samples of the release area. If the samples come back clean, send them in with a Final C-141 and a site map and we should be good.

Heather,

I just looked up this c141 on the OCD imaging website to check on it, and saw that you wanted a remediation proposal by 7-27-16. There really isn't anything to propose. We've already done two different applications of Micro Blaze along with scraping up surface contamination off the pad. Let me know what I need to do. Thanks.

A handwritten signature in black ink, appearing to read 'Z. Thomas', is written in a cursive style.
