Kimberly,

Your proposal for remediation of the above referenced release is approved. Please advise if the proposed excavation depths are not achieved. It is OCD's understanding that after the proposed soil removal, impacted material that remains on the well site, will be deferred to a later date or, site abandonment. Upon receipt of closure documentation, entries will be made in OCD data base referencing the deferment, and the incident will remain open in the

database.

Federal sites will require like approval from BLM.

OCD approval does not relieve the operator of liability should their operations fail to adequately investigate and remediate contamination that may pose a threat to ground water, surface water, human health or the environment. In addition, OCD approval does not relieve the operator of responsibility for compliance with any other federal, state, local laws and/or regulations.

If you have any questions or concerns, and for notification, please contact me.

Mike Bratcher
