RE: Yates \* Juniper BIP Fed. #8H \* 30-015-37252 \* 2RP-2394

Mr. Asher,

Due to the site ranking and the analytical data presented, the OCD would prefer an excavation through the 2' interval. Alternatively, because of the sample date and the large volume of rainfall experienced since then, this site could be resampled at each interval and reevaluated once new analytical data is available.

OCD approval does not relieve the operator of liability should their operations fail to adequately investigate and remediate contamination that may pose a threat to ground water, surface water, human health or the environment. In addition, OCD approval does not relieve the operator of responsibility for compliance with any other federal, state, local laws and/or regulations.

If you have any questions or concerns, and for notification, please contact me.

Heather Patterson  
Environmental Specialist  
NMOCD District II

The release area was scraped of approximately 6" of pad material. The pad area below is rock, no further material was excavated.

Thank you.

Bob,

What are the excavations depths you reached on this site?
