If a Watercourse was Impacted, Describe Fully.* N/A			
Describe Cause of Problem and Remedial Action Taken.*			
This is a historical release that occurred due to a failing valve or connection on a 6" PVC line prior to the pipeline being taken out of service.			
Describe Area Affected and Cleanup Action Taken.*			
An approximate area of 30' X 20' was affected around the tin horn. Vertical and horizontal delineation samples will be taken and analysis ran for TPH &			
BTEX (chlorides for documentation). If initial analytical results for TPH & BTEX are under RRAL's (site ranking is 0) a Final Report, C-141 will be			
submitted to the OCD requesting closure. If the analytical results are above the RRAL a work plan will be submitted to the OCD. Depth to Ground			
Water: >100' (approximately 275', Section 12, T19S-R24E, per Trend Map), Wellhead Protection Area: No, Distance to Surface Water Body:			
>1000', SITE RANKING IS 0. Based on completion of the NMOCD approved work plan, Yates Petroleum Corporation requests closure.			
I hereby certify that the information given above is true and complete to the best of my knowledge and understand that pursuant to NMOCD rules and			
regulations all operators are required to report and/or file certain release notifications and perform corrective actions for releases which may endanger			
public health or the environment. The acceptance of a C-141 report by the NMOCD marked as "Final Report" does not relieve the operator of liability			
should their operations have failed to adequately investigate and remediate contamination that pose a threat to ground water, surface water, human health			
or the environment. In addition, NMOCD acceptance of a C-141 report does not relieve the operator of responsibility for compliance with any other			
federal, state, or local laws and/or regulations.
