**Describe Cause of Problem and Remedial Action Taken.\***

Flow line to the East of the lease road was struck by unknown object and cut causing a 2bbl spray in the lease road. The transfer pump was immediately isolated and a crew was contacted to fuse the line back together. Repairs have been made to the line.

**Describe Area Affected and Cleanup Action Taken.\***

2bbls of produced water was released from a flow line. The size of the affected area is 10'x10' contained completely on the lease road to the East of the Cotton Draw Unit 65. 0bbls were recovered and an environmental agency will be contacted for remediation.

The hydrocarbon impacted soil within the flow path from S-1 through S-3 was excavated to a depth of 0.5-foot deep. The 2 barrel overspray on the lease road East of the location in regards to Incident number 2RP-3467 was also scraped 0.5-foot while excavating in the vicinity of S-3. The impacted area within the S-4 flow path was excavated to the depth of 1-foot deep. All contaminated soil was transported to Lea Land, LLC; an approved disposal facility. The excavated areas on location and lease road were backfilled with new caliche, machine compacted and re-contoured to match the surrounding location.

I hereby certify that the information given above is true and complete to the best of my knowledge and understand that pursuant to NMOCD rules and regulations all operators are required to report and/or file certain release notifications and perform corrective actions for releases which may endanger public health or the environment. The acceptance of a C-141 report by the NMOCD marked as "Final Report" does not relieve the operator of liability should their operations have failed to adequately investigate and remediate contamination that pose a threat to ground water, surface water, human health or the environment. In addition, NMOCD acceptance of a C-141 report does not relieve the operator of responsibility for compliance with any other federal, state, or local laws and/or regulations.
