RE: COG * Showstopper 7 Fed Com #1H * 30-015-36559 * 2RP-3802

Ike,

Your proposed remediation for the above listed release is approved. Please note that while your work plan cites the "NMOCD groundwater map", the NMOCD has not published a groundwater map. My assumption is that you are referring the Chevron Texaco Trend Map. In the event that excavation depths cannot be met, please contact the OCD. Like approval by BLM is required for this site.

OCD approval does not relieve the operator of liability should their operations fail to adequately investigate and remediate contamination that may pose a threat to ground water, surface water, human health or the environment. In addition, OCD approval does not relieve the operator of responsibility for compliance with any other federal, state, local laws and/or regulations.

If you have any questions or concerns, and for notification, please contact me.

Heather Patterson

Heather and Shelly,

Here is the work plan for the COG – Showstopper 7 Federal Com #001H located in Eddy County, New Mexico. Once approved, COG will implement the proposed work plan. Let me know if you have any questions or comments on the work plan. Thanks
