**RE: Burnett Oil \* Gissler A 2 Battery \* 30-015-33498 \* 2RP-3590**

Johnny,

We can approve the use of Aspen Grow in this area, but we will first need an upfront delineation and a site map. Also, this was reported as a 200 bbl spill, but your report calls it a 2000 bbl spill. I believe the original reporting is the correct amount. I would recommend revising your work plan to avoid any confusion.

OCD approval does not relieve the operator of liability should their operations fail to adequately investigate and remediate contamination that may pose a threat to ground water, surface water, human health or the environment. In addition, OCD approval does not relieve the operator of responsibility for compliance with any other federal, state, local laws and/or regulations.

If you have any questions or concerns, and for notification, please contact me.

All,

Attached is the work plan for the Gissler A 2 Tank Battery. Aspen Grow is will be performing the remediation and after the fourth application of the product, samples will be collected. The samples will be taken to an accredited lab for analysis. Once the analytical has been reviewed, a decision will be made to continue remediation or to close out the remediation. If there are any questions or concerns, feel free to contact us. Thank you.
