**Subject:** RE: Cotton Draw Unit 182H-Final C-141

RE: Devon Energy \* **2RP-3678**

All,

Hopefully for clarification, the C-141 submitted for this release did not have an API number listed. It was opened utilizing the legal description (STR & footages) and Lat/Long provided. This information turned out to be for the Cotton Draw Unit 90 (30-015-31889). As a result, for bond release purposes, it showed in OCD database as having an open environmental issue.

At this time, OCD approves the closure request for 2RP-3678 and clears Cotton Draw Unit 90 (30-015-31889) on any open compliance issues. I am very sorry for the mix up on this end.

Since this is a closure, as always:

OCD approval does not relieve the operator of liability should their operations fail to adequately investigate and remediate contamination that may pose a threat to ground water, surface water, human health or the environment. In addition, OCD approval does not relieve the operator of responsibility for compliance with any other federal, state, local laws and/or regulations.

If you have any questions or concerns, please contact me.

Thank you,

Mike Bratcher

Good afternoon,

Please find attached the Final C-141 and work plans for the Cotton Draw Unit 182H Battery release of 700 BBLS produced water that occurred on 5/1/2016.

Please contact me with any questions you may have.

Thank you.

Respectfully,

*Sarah Gallegos-Troublefield*
