Mike and Crystal

Sorry I tried to reply from cell phone and it didn't go thru.

DCP made one site visit on Tuesday February 14, 2017 to assess the site and a one call was placed for delineation efforts.

We have hired a 3rd party company (Tasman Geo Sciences) to start delineation the week of March 13th, 2017.

I have attached the email that was sent from Kyle Norman from Tasman on February 13th, 2017.

Yvonne,

We are getting fairly persistent calls on this. Do you have any updates?

Mike

I will contact you in the morning I was in midland today and catching up on emails and voicemails.

Yvonne

Yvonne,

I am attempting to follow up on a complaint I received on Feb 2. I did talk with Bill Cupp a little bit ago and he indicated it was a DCP line that had a leak, got repaired and put back in service. I understand that there may still be some impacted material at this site in a stockpile and potentially still in the ground. I will provide the coordinates below, and if you would check into this and let me know what is going on, I would appreciate it.

32.1818
104.3006

Bill has been to the site and indicated he would coordinate with you.

Thank you,
