**Subject:** RE: EOG - Ross Gulch 8-3 SWD - 2 RP 3993 - Remediation Notification

RE: 2RP-3993

Ike,

After completion of the proposed excavation at "Trench 3" please obtain a confirmation sample from the 2.5' interval. Field screens may be used, and if the area shows above 1000 mg/kg, please remove as much impacted material as practicable. Additional research at this site has shown at least one water source well exists at less than 1000' from the location.

If you have any questions or concerns, please contact me.

Thanks,

Mike Bratcher

Mike,

EOG is scheduled to performed the proposed remediation at the above referenced site on Friday (3-31-17). Once excavated to the appropriate depth, the area will be backfilled with clean soil to grade. Tetra Tech will then follow-up with a closure report for the site. Let me know if you need additional information, thanks

RE: EOG Resources \* Ross Gulch 8-3 \* **2RP-3993** \* DOR: 11/6/16

Ike,

Your proposal for remediation of the above referenced release is approved. OCD requests samples be obtained for analyses just outside the identified impact areas, for confirmation of lateral definition. Notify OCD if the excavation proposed is not achieved. Please advise once remedial activities have been scheduled.

OCD approval does not relieve the operator of liability should their operations fail to adequately investigate and remediate contamination that may pose a threat to ground water, surface water, human health or the environment. In addition, OCD approval does not relieve the operator of responsibility for compliance with any other federal, state, local laws and/or regulations.

If you have any questions or concerns, and for notification, please contact me.

Mike,

Here is the work plan for the EOG - Ross Gulch 8-3 SWD located in Eddy County, New Mexico. Once approved, EOG will implement the proposed work plan and follow-up with a closure report when completed. Let me know if you have any questions or comments on the work plan. Thanks
