Crystal,

We are actively working on this location and have the contractor set up to complete delineation work early next week. Delineation will be attempted by using a hand auger and samples will be collected and expedited with the lab. If we are unable to delineate by hand to a 4-feet depth we will then have to regroup, make a One Call and bring in a backhoe for further delineation which will carry our project further out. Once I hear back from the contractor I will follow back up with you on our expected schedule.

Thanks,

Mike Shoemaker  
EHS Representative
