**Subject:** RE: [EXTERNAL] RE: WPX RDU 12 - initial spill notification

Good morning Crystal,

Yes, we excavated the oil impacted soil from the pad's surface and from the drainage (see emails below). I guess my crystal ball was working this time as I already collected more samples from the RDU 12-1 and sent them to the lab on Friday. I'll submit the results as soon as I reach chloride concentrations at 250 ppm or less.

Please let me know if you have any additional questions or concerns.

Thank you and have a great day,

*Karolina Blaney*

RE: WPX Energy \* RDU 12 \* 30-015-24793 \* 2RP-4095

Good afternoon Karolina,

Mike and I looked over your response and we would like to request if you could show us where chlorides clean up to 250ppm at sample point RDU 12-1. Also when you say the drainage area will need to be re-contoured what is meant by that? Was there an excavation in this area?

Other than that the rest of what you have proposed sounds good to us.

Thank you,

**Crystal Weaver**

**Subject:** RE: WPX RDU 12 - initial spill notification

Good afternoon,

I received the lab results for samples collected from the dry ditch located west of the RDU 12 pad – please see the attached lab report and sample location map.

It appears that the samples collected from the drainage are below OCD's cleanup standards for hydrocarbons (Ranking score is 0) and since there is no cleanup standards for salts, I'll let OCD decide if the drainage is clean enough.

The sample collected on the well pad has elevated chloride concentrations and the impacts will be further delineated.

Please let me know if the drainage meets BLM's and OCD's cleanup standards; the drainage will not be re-contoured until the remediation activities are completed.

Thank you,

**Subject:** RE: WPX RDU 12 - initial spill notification

Hey Shelly,

I pulled the Arch info and hand drew the spill (red line – not to scale) and it seems like we should be OK.

I still think it would be beneficial to have an onsite prior to excavation.

Thank you so much,

**Subject:** Re: WPX RDU 12 - initial spill notification

Karolina,

I need the GPS coords for this release. There is an ARCH site that is right against and around the area of this location. After I receive the information, we may need to meet to discuss this release so we avoid or have minimal impact to the arch site.

If you have any questions or concerns, please do not hesitate to contact me.

Sincerely,

*Shelly J Tucker*

Good morning,

WPX had a spill yesterday, 1/11/17, caused by human error; stuffing box failure. Approximately 12 bbls of oil and water was spilled with 4.5 bbls recovered from the pad. The spill migrated west of the pad, entered a dry drainage and migrated for about 100 yards. Due to access constraints, we were unable to vacuum the free standing oil from the drainage. To prevent further migration, the oil was absorbed with dirt. The impacted area was GPS-ed and the end of the impacts in the drainage was additionally marked with a flag. We will start the excavation activities once I receive your approval.

The line locate call was placed yesterday and we should be ready to go by Monday.

Please let me know if you would like an onsite prior to the excavation activities. We will do our best to minimize the impacts but, unfortunately, I think we will damage some vegetation during this cleanup.

Please let me know if you have any comments and suggestions.

Thank you for your help,
