---

Hello all,

I stand corrected. There were additional documents beyond the memo I cited as the last document OCD had received. They were just not in the places I was looking. So for that mix up I apologize.

Ok, so monitoring wells were installed and water samples were taken from the 3 wells back in July 2015. However, an update on this site would still be ideal since the consultant did recommend quarterly water samples be taken.

Thank you,

## Crystal Weaver

RE: EOG Y \* Compromise SWD #1 \* 30-015-25665 \* 2RP-4208 and follow up request on 2RP-2797

Chase,

I have included a scanned copy of the signed Initial C-141 Remediation Permit along with an

attached Conditions of Approval. The OCD tracking number for this event is 2RP-4208.

**PLEASE NOTE:** OCD has reviewed this API location and noted that there have been 7 documented spills that have involved either the battery site or the SWD well. OCD would like to, at this point, pose the question, to EOG Y Resources, of is there any intention to replace infrastructure for Compromise SWD # 1 and the tank batteries?

Also during my investigation of this file, I came across **2RP-2797** which had a DOR of 1/16/15 with 2500bbls of produced water from a hole in a surface supply line. After vigorous efforts by OCD members it was finally agreed upon that monitoring wells would be installed and it was claimed that a permit was applied for from OSE for said wells. The last document we have is a memo from Safety & Environmental Solutions proposing procedures for monitoring well installation. I have attached that document and the original C-141 above. Please expedite your efforts to provide an update on this matter as soon as possible.

Thank you,

**Subject:** Compromise SWD #1 C-141

Please find attached the C-141 Initial for the below listed location. This release site has already undergone initial sampling on May 8, 2017. Background sampling will be conducted the week of May 22-26, 2017, the exact time and date has not been determined and will be dependent upon contractor availability.

Compromise SWD #1
